AAEOY SPEAKER SERIES

1:30

PM. PST

Presentation:

Define and Drive AI science leadership:
Computational Methods for
Next Generation Healthcare

Interview: Career Journey -
A Female Leader in STEM Fields

Q & A

Next-generation healthcare will be driven by prevention and treatment strategies that take individual variability into consideration. Much of this variability is captured in the large amount of data of different types: clinical encounters, lab results, diagnostics, medications, genomics, physiological, lifestyle, social behavioral, etc. Speaker will discuss these methodologies, use cases, lessons learned and important future directions.
